Kollam, Kerala

## SUMMARY

I am a passionate Python developer with hands-on experience in designing, developing, and maintaining software applications. I pride myself on writing clean, efficient code and implementing robust database architecture. My experience includes working on diverse projects in dynamic environments, where I've honed my skills in frameworks like Django and gained collaborative experience in version control.

## EXPERIENCE

Python Developer

Codesvera Infotech

06/2023 - 10/2024 Trivandrum

- Played a key role in an appointment system project by helping implement new features.
- Designed and implemented the database architecture, contributing to ongoing maintenance.
- Gained experience in version control through active participation in the development process.
- Worked on the admin side of a hotel booking application for managing reservations.
- Designed and implemented features for viewing bookings, managing transactions, and creating special offers.
- Optimized the database for efficient data handling and system performance.
